Full Stack Web Developer

Creative, detail oriented software engineer with a deep interest in AI and over 5 years of experience creating elegant, scalable web applications. Passionate about staying current with industry trends and utilizing cutting edge technologies to deliver high-quality and accessible web solutions.

WORK EXPERIENCE

100 Devs • Remote • Part-time • 11/2021 – 01/2023

Web development agency connecting a variety of clients with a community of developers to create web solutions for business use.

Full Stack Developer

- Collaborated with a team of developers to build 10+ modern and responsive web applications using best practices.
- Increased development efficiency by ~20% in 3 months using Agile methodology.
- Utilized React to create a complex and interactive UI for each project. Built and deployed products using Next and Vercel for increased SEO and performance.
- Maintained and improved upon initial products by debugging any reported errors and adding new features to improve the application.

CodeWizardsHQ • Remote • Part-time • 05/2022 – Present

Software Development Instructor

- Delivered and facilitated coding courses for 200+ students, training them to build software applications over a 12-week course.
- Performed weekly code reviews on student projects using space and time complexity to teach students about optimization.
- Implemented changes to class flow resulting in ~50% more interaction from students during lessons.
- Demonstrated the workflow of a typical developer using Git and Github to allow students to practice collaborating on a large project.

Self Employed • Sacramento, CA • Full-time • 08/2020 – 05/2022

Freelance Developer

- Built and designed responsive and modern landing pages using HTML, CSS, and Javascript, improving the client's web presence and visibility.
- Implemented web applications with the MERN tech stack to streamline business processes and improve user experience for local clients.

SKILLS

React, Node, Next, MongoDB, Relational Databases, Express, PostgreSQL, OOP, ORM, Tailwind CSS, Javascript, Typescript
